Insulock PVC Fitting Cover System

Insulock PVC cladding is a complete insulation system. The Insulock Fitting Cover System consists of one piece pre moulded high impact PVC fitting covers which include elbows, tee/valves, end caps, mechanical line couplings, specialty fittings, white and indoor colour jacketing.

The Insulock PVC fitting cover system is ideally suited for insulating cold, hot, refrigerated, chilled or steam piping in commercial, industrial, institutional, food and pharmaceutical industries. Insulock PVC stays white and has exceptional outdoor weathering, this makes it ideal for outside applications. Because it reflects solar radiation from its surface, the cladding system has minimal temperature fluctuation.

Insulock are the leader in PVC fitting cover systems. We offer the largest range of PVC moulded fittings in Australia and are the only company that offer Exotuff™ and Exod™ PVC. With over 25 years experience we have gained a reputation of excellence by offering superior products and an unsurpassed commitment to customer service. If you require any further information please contact our sales team.

Australia's first and best PVC Fitting Cover System.

Jacket Types

- A Series Regular
- Exotuff™
 - High Temperature
- A Series Coloured
 - Indoor Only
- Exod™ Grey
 - High Chemical Resistance and High Deflection Temperature

Features and Benefits

- UV Resistant
- Excellent Appearance
- Easy to clean
- Low Cost Installation
- Positive Vapour Barrier
- Wide Temperature Range
- Long Lasting
- Excellent Thermal Value
- Resistance to Fungi and Bacteria
